Our Services

All Specialists on site. All in one place. Interventional pain management. Anesthesiology. Physical Medicine and Rehab. Psychologist. Psychiatrist. Physical Therapy. Pharmacy. Durable Medical Equipment. Home Care. Our **FLOUROSCOPY MACHINE** can look inside your spine and other joints and place medication exactly where its needed.

ULTRASOUND MACHINE can actually see the soft tissues and treat bursitis, tendonitis, ligament tear, carpal tunnel, fluid in joint, muscle tear, etc.

EMG AND NERVE CONDUCTION tests can precisely detect nerve causing sciatica pain in the legs or radicular pain going from the neck to the arms and hands. It also confirms the carpal tunnel syndrome. Our physician is one of the well known experts in this technique.

Epidural injection under fluoroscopy will relieve the pain of sciatica and radicular pain from back and neck pain going to leg or arm.

Our **RADIOFREQUENCY** equipment (RF) can take care of the PAIN NERVE ENDINGS (**Rhizotomy**) to give prolonged relief of pain. Sacroiliac and facet pain (back and neck pain) can be relieved for one year.

Our technique of **DISCOGRAM** can detect even the minute abnormalities of a prolapsed disc and disc degeneration, even if an MRI has not been able to detect it. **DISC DECOMPRESSION (PERCUTANEOUS DISCECTOMY)** can be done without surgery.

At THE PAIN CENTER, we can do **SPINAL CORD STIMULATION** in cases of failed back and neck surgery and neuropathic pain related to diabetes. It will block the pain impulses going through the spinal cord to the brain. For fractures of the vertebra, we can inject cement to relieve the pain and restore height by **VERTEBROPLASTY**.

One of our specialists is also certified in **SUBOXONE** treatment and deals with de-addiction. **Apart from back and neck pain, THE PAIN CENTER also provides a variety of treatments for hip, knee, leg, shoulder and arm pain, wrist pain and chronic headaches.. We specialize in auto and work injuries.**

THERE IS AN ANSWER, AND IT'S NOT SURGERY.
